HEALTH AND SAFETY INFORMATION

ROUTES OF EXPOSURE

Grinding or heating hardmetal blanks or hardmetal products will produce dust or fumes with dangerous ingredients that can be inhaled or swallowed, or which might come in contact with the skin or eyes.

ACUTE TOXICITY

The dust is toxic by inhalation. Inhalation may cause irritation and inflammation in the airways. Skin contact can cause irritation and rash. Sensitive people may experience an allergic reaction.

CHRONIC TOXICITY

Repeated inhalation of aerosols containing cobalt may cause obstruction in the airways. Prolonged inhalation of increased concentrations may cause lung fibrosis or lung cancer. Cobalt is a potent skin sensitizer. Repeated or prolonged contact can cause sensitization.

CLASSIFICATION

Following hazard classification according to GHS/CLP applies to the hardmetal powder (3 % ≤ Co < 10 %):

- Acute Inhalation 3, H331: Toxic if inhaled
- Carcinogenicity 1B, H350i: May cause cancer by inhalation
- Repr. 2, H361f: Suspected of damaging fertility
- STOT RE 1, H372: Causes damage to lungs through prolonged or repeated exposure through inhalation
- Resp. Sens. 1B, H334: May cause allergy or asthma symptoms or breathing difficulties if inhaled
- Skin Sens. 1, H317: May cause an allergic skin reaction.
- Aquatic Acute 1, H400: Very toxic to aquatic life
- Aquatic Chronic 2, H411: Toxic to aquatic life, with long lasting effects.

PRECAUTIONARY STATEMENTS

- Do not breathe the dust
- Wear protective gloves/protective clothing/eye protection
- In case of inadequate ventilation, wear respiratory protection
- Avoid release into the environment

IF INHALED: If breathing is difficult, remove the victim to fresh air and keep them at rest in a position comfortable for breathing. If they are experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician.

ROTATING PARTS

Shank adapters, rods and bits are rotating parts and can cause severe injury. Stay away while drill rig is in operation. Do not change bit during rotation as you can get stuck and severely injured.

DISASSEMBLY OF HOT BIT, ROD, COUPLING, SLEEVE, SHANK ADAPTER AND INTEGRAL STEEL

- Ensure that products have cooled down before disassembling
- Never work on hot parts
- Consider the appropriate hand protection (gloves) for the handling of warm parts

CHANGING BITS

Do not use a sledge hammer or similar to loosen bits as steel parts may detach and cause severe damage on body parts. Instead use appropriate tools such as knock-off tools or wrenches.

CLEANING OF RODS

A particular hazard exists with cleaning rods if the rods contain explosives. Sandvik rock tools should never be used in a hole that has been filled with explosives.

DEALING WITH WORN PARTS

Worn parts should be removed and disposed appropriately. Consider recycling any used drill bits. Please contact your local Sandvik representative for support and further information regarding the recycling process.

HANDLING OF HEAVY TOOLS

Lifting heavy items is one of the leading causes of injury, ie strain and crushing body parts in workplaces. Be aware that many of our tools are heavy and take the needed actions before any manual handling is done to prevent injuries.

STORING

All products should be stored in a dry place and in their original packaging until they are required for use.

GENERAL

The products in this catalog are designed for drilling holes in rock, and should only be used for this purpose.

SANDVIK ROCK TOOLS: A SUSTAINABLE CHOICE

Sandvik Rock Tools is committed to contributing to a sustainable world. This commitment is in line with our Sandvik Group sustainability agenda, and we are determined to take action to make the mining industry as sustainable as possible and secure the necessary minerals we needed to make the shift towards a sustainable future.

With three clearly defined focus areas for our sustainability work, we embark on this important journey: We Lead the Way, We Build Circularity and We Shift Climate.

SUSTAINABILITY MISSION STATEMENT

Sandvik Rock Tools has developed a Sustainability Mission Statement. This states that "we should be a forerunner in making the shift to sustainable business in our industry by being an innovative business partner, who delivers sustainable values (people, planet, profit) for all stakeholders in our industry".

The Sustainability Mission Statement also clarifies how we drive the sustainability progress within our division through the following four areas:

WE ARE A PART OF THE SOLUTION

We commit to climate action to reach or exceed targets agreed in the Paris Agreement. We will reach carbon neutrality in our entire value chain by 2045.

WE TAKE RESPONSIBILITY FOR OUR BUSINESS IMPACTS

We drive continuous improvement of sustainable mining and construction practices. Our offerings will not only be of the highest quality and effectiveness but also the most resource-efficient and circular.

WE OPTIMIZE OUR OPERATIONS

Our operations, logistics and supplier base will be climate neutral, resource-lean and, as a result, nearly zero waste. We aim for zero harm to people.

WE ARE SUSTAINABLE PEOPLE

We shall be a true learning organization with the highest level of knowledge and awareness within sustainability. Sustainability is always part of what we do.

Learn more about our sustainability work and read our full sustainability report online.

EXPERIENCE THE CALMNESS OF RECYCLING

Few dispute the fact that we need to change the way we operate to further reduce our impact on the planet. We know that small streams make great rivers – and when working together, we make an impact. With our Rock Tools Recycling Program, we support a secure source of scarce minerals, lower the environmental impact and reduce waste.

RECYCLING INCLUDED

Doing the right thing should be easy. That is why our carbide recycling program is now included with all our carbide rock tools. It is completely free – you even get paid for the collected minerals.

Experience the calming effects of recycling, while you know that your worn-out rock tools will be taken care of.

FOR THE FUTURE

Carbide rock tools contain tungsten – a scarce and finite mineral expected to run out in 40 to 100 years. With our Recycling Program, we build circularity. It guarantees the production of premium tools that you can use again, and again, and again – today and in the future.

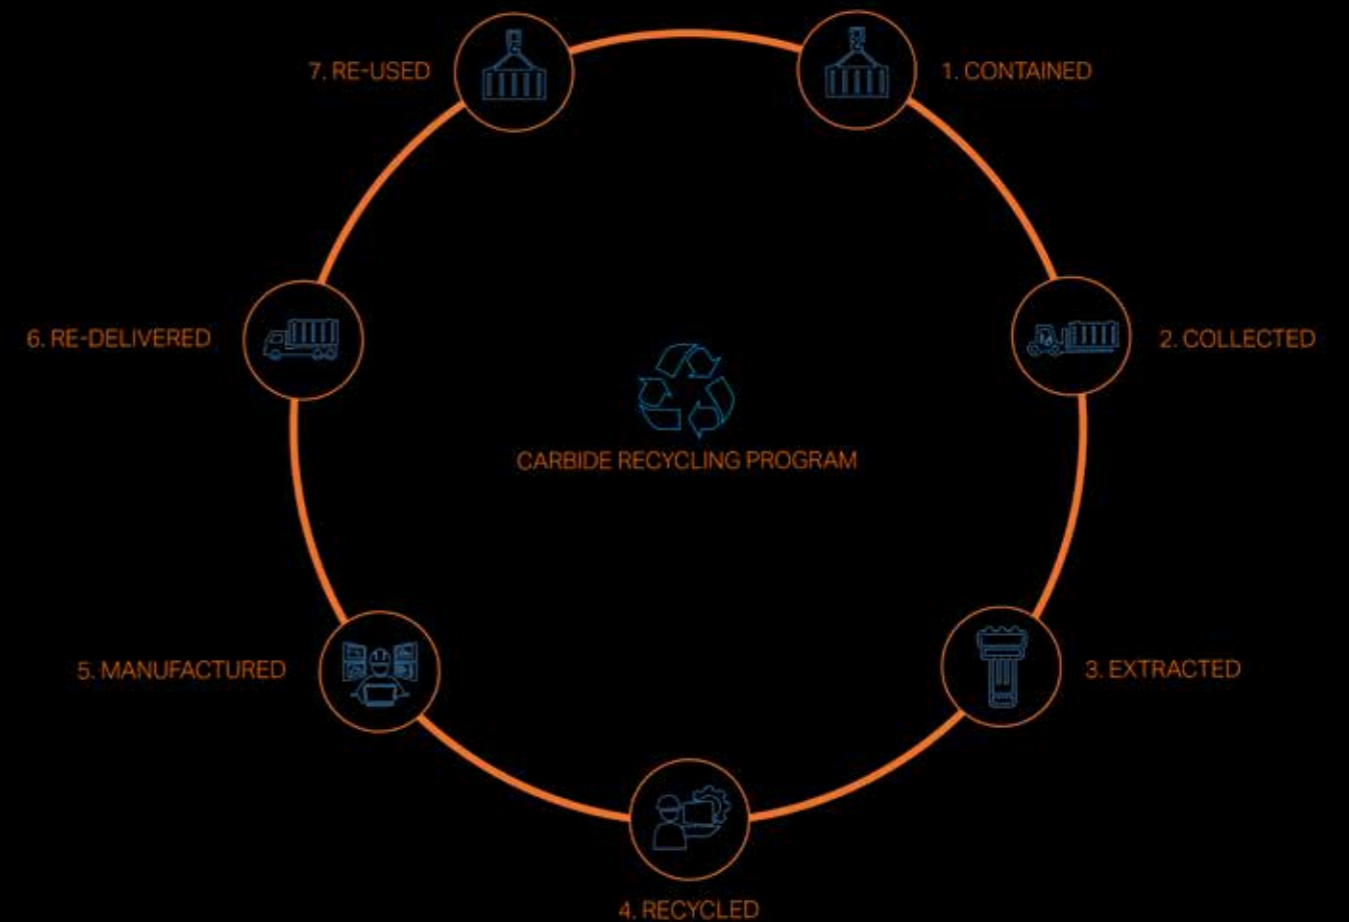

ROCK TOOLS CARBIDE RECYCLING

HOW DOES IT WORK?

We provide containers for your site in which you place your worn-out carbide tools. The worn-out tools are regularly collected, and the carbide inserts are removed locally by using our unique local extraction method. The inserts are then transported to our ISO certified factory, where the cemented carbide is recycled and brought back into production of new carbide rock tools.*

This is one important action of making sure that raw materials are used in an efficient and sustainable way, and that our products are recycled when they reach end-of-life.

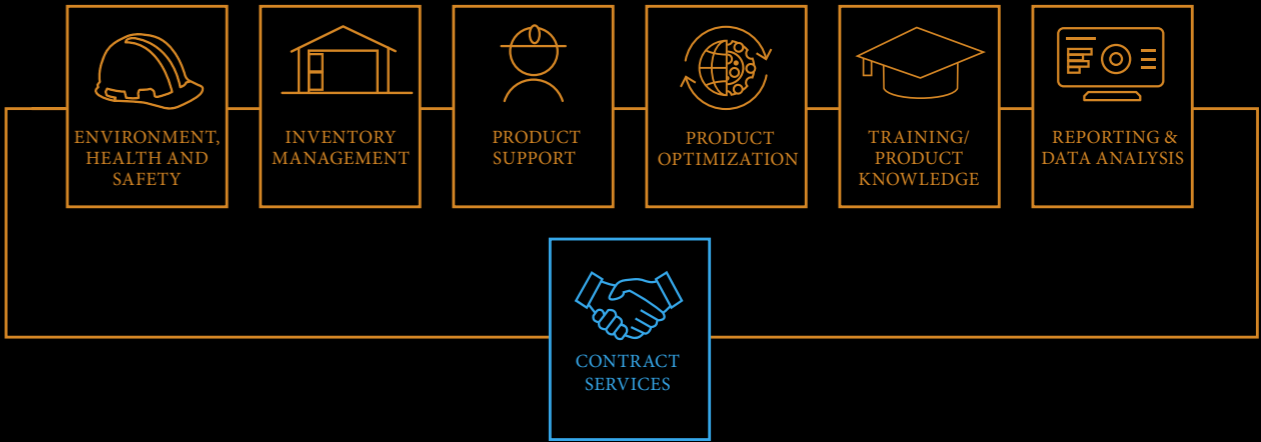

*Please contact your local Sandvik representative for specific terms and conditions for your local market.

ROCK TOOLS SERVICES

Sandvik is a world-leader in the supply of mining and rock excavation tools and equipment. In addition to supplying your operation with the premium brand of rock tools, our range of added services and digital solutions support your drilling operations, everyday – all year round. And we can also take full responsibility for the supply and life cycle management of your tools with our Rock Tools Contract Services. Overall, we do everything we can to ensure you get maximum life, productivity and performance from your rock tools, so that you can achieve the lowest total drilling costs. With Sandvik Rock Tools Services, you will never work alone.

POWERCARBIDE®

PowerCarbide® is the gathering of our most powerful carbide grades, representing the very best materials technology we have to offer. The innovative PowerCarbide® grades enable the buttons to retain their shape as long as possible. This ensures longer grinding intervals, fewer bit changes and improved safety.

DUAL PROPERTY GRADES

DP55 has wear resistance similar to our standard grades but offers greater toughness. It is especially suited to large ballistic inserts, accommodating the higher loads the insert may be exposed to due to a longer protrusion. DP65 has similar toughness to our standard grades, but a considerably higher wear resistance. This grade works best when drilling in very abrasive rock with large spherical inserts.

DP55 Grade

GC81 Grade

SH70 Grade

XT49 Grade

GRADIENT CARBIDE GRADES

GC80 and GC81 is developed for hard and abrasive ground conditions. Our innovative manufacturing process makes it possible to produce buttons that are wear-resistant on the outside, while the center provides a toughness that further extends service life and grinding intervals.

SELF-HARDENING GRADES

SH70 is a grade with homogeneous properties throughout the material. It is "self-hardening" as it has the ability to become both more wear resistant and tougher as drilling progresses.

The hardness of the insert surface continuously increases during drilling, which means that the hard top never wears off. The self-hardening effect is greatest in hard and competent ground.

XT GRADES

XT49 takes the standard straight grade XT48 to the next level. Our manufacturing process enables the reduction of early breakages of the insert. As this grade is more resilient to breakage, it enables more protrusion and a sharper geometry.

Toughness

Hardness

TOP HAMMER TAPERED BITS MORE POWER. LESS WASTE.

The upgraded Top Hammer Tapered Bits comes with dual value as we are adding our tough and resilient PowerCarbide® grades, and at the same time using at least 60% recycled carbide. They also feature an improved steel grade and perfect bit-rod connection. A great choice for sustainable operations, without having to lower your expectations on high quality and performance.

The new, optimized design of the 12°, 33 mm tapered bit works perfectly for both mining and construction customers around the globe. With the flexibility of choosing different flushing capabilities and carbide grades – XT49 and SH70 - you are also set for most ground conditions.

PRODUCT VALUES

- Increased service life 20-50% vs competitors
- Increased safety by doing less bit changes
- Less interruptions in production
- Lower cost per meter
- Reduced risk of early button breakage
- Optimized flushing

EXTEND SERVICE LIFE INCREASE PRODUCTIVITY

Integral drill steels, tapered rods, drill bits and threaded rods are crucial for peak productivity in all applications. Our drill steel has a high fatigue strength and toughness, and offers the high wear resistance that ensures an efficient and economic drilling operation. The unique Sandvik R23 rods and bits for extension drilling provide the strongest thread in

sizes ranging from 33 to 45 mm. For underground applications, we have fully carburized rods with superior wear resistance and service life. When you partner with Sandvik, you can expect consistently high quality and maximum operational dependability when it comes to all small hole drilling applications.

BIT DIAMETER NOTES

All bit diameters are larger than the given dimensions in the catalog.

Cross bits: Can be a maximum of +1 mm due to manufacturing tolerance.

Button bits: Some bit designs can be a maximum +3 mm to compensate for fast diameter wear. The minimum diameter for all button bits is +1.5 mm above the given dimensions.

Keep in mind that a bit always drills a bigger hole than the stated bit diameter.

TOOL SELECTION

SANDVIK TOOL SELECTION FOR SMALL HOLE DRILLING

DESIGN 19

Designed for short holes < 2 m, these low-pressure hammers are ideal for solid rock formations.

DESIGN 44/52

This premium, wear resistant bit features a strong gauge and is designed to be a strong performer in all rock conditions. The high-pressure hammers are specifically made to achieve high penetration rates.

DESIGN 54

With this premium bit, designed for high wear resistance in all rock conditions – featuring a strong gauge – you can get the most out of your operations. The high-pressure hammers also deliver quick penetration rates.

ALWAYS IMPROVING YOUR SOLUTIONS

Our engineers are continuously engaged in upgrading our tool systems. Supported by our in-house manufacturing facilities, they engineer solutions that enable you and other rock-drilling professionals around the world to work even more profitably with the latest technology.

A (R)EVOLUTION IN TOP HAMMER DRILLING

Sandvik Alpha™ Asymmetric drilling tools are the latest innovation in Top Hammer drilling for mine development and tunneling. Inspired by the force of evolution and powered for a successful operation.

UNIQUE ASYMMETRIC THREAD DESIGN

Sandvik Alpha™ features a unique and asymmetric thread design, that offers strenght exactly where it is needed the most and a tool system that is very easy to uncouple. By using different flank angles of the thread profile, the stress levels are reduced in the critical area of the tightening flank, where many breakages begin. The short and robust bit thread results in a rigid, integrated powerpack drill string that increases your rate of penetration, give perfect energy transfer and ensures a longer service life. A strong guide section also enables exact collaring and great hole accuracy – even in complex rock formations and against uneven surfaces.

ADVANTAGES

- Extended service life with up to 30%
- Higher rate of advance
- Lower cost per meter
- Exact collaring
- Reduced overbreak
- Improved flushing for higher drilling speed
- Superior hole accuracy and hole straightness
- Faster and easier uncoupling of bits
- Reduced machine downtime

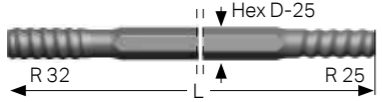

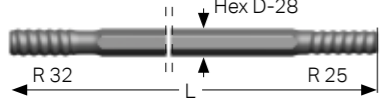

*Test results and calculations are to be considered as results reached under certain and controlled conditions. These test results and calculations should not be treated as specifications and Sandvik does not guarantee, warrant or represent the outcome of test results in any or all circumstances.

FACE DRILLING AND BOLTING

SANDVIK DRIFTER BITS

SANDVIK BITS FOR DRIFTING AND TUNNELING ARE AVAILABLE IN FIVE BASIC DESIGNS

TYPE 51

Featuring a new best-of-both-worlds carbide grade, this bit design is ideal for abrasive rock.

TYPE 52

Designed for maximum bit life in hard and abrasive rock.

TYPE 53

All-round design with a good tradeoff between speed and bit life length for hard to medium hard rock.

TYPE 54

All-round design with high penetration rate for hard to medium hard rock.

TYPE 55

Designed for maximum penetration rate in softer and less abrasive rock formations.

TYPE 60, SPEEDY BIT

The fastest bit in the industry is designed for high speed and great durability in hard to medium-hard rock.

EXTEND LIFE, REDUCE COSTS

Drill rods and tubes represent a significant part of your tool cost in bench drilling. As our industry requires increasingly deeper holes, the cost for drill rods and tubes goes up. But imagine if they were designed to last 30 percent longer, so you could drill more meters every shift and reduce your cost per meter – increasing your productivity and profit.

Sandvik +Range of friction welded rods offer better wear and fatigue resistance due to their improved heat treatment and welding process. The rods benefit from a better thread fit and coupling/uncoupling properties, plus reduced incidence of fatigue thanks to better thread surface smoothness.

WELDED, NOT FORGED

Our +Range rods are created using friction welding, rather than forged. Forged rods are forced to have the same material and heat treatment in the whole MF-rod. However, the combination of specialized heat treatments in specific parts of the + Range rods, in addition to an improved mixture of alloys in the material, allow for optimal performance.

The Sandvik +Range rods are more resilient, with improved fatigue resistance to increase service time and reduce the need to stop and replace. In addition, a smoother thread surface and new thread release reduce breakage incidence.

30% MORE LIFE

Extensive in-mine tests proved a 30 percent longer service life compared with previous standard offerings, with some achieving significantly higher increases. The patented, top-of-the-line steel alloy is designed to withstand intense heat from friction, high impact from hydraulic hammers and adhesion, which means your new rods will last much longer before they're worn out from galling and pitting. Extending the service life of your rods and tubes by an average of 30 percent means more meters drilled using fewer rods – all with far higher productivity due to reduced stops and increased drilling time.

PRODUCTION POWER ACCURACY & RELIABILITY

Production drilling is at the very heart of your mine. It is therefore vital that you choose products that deliver the accuracy and quality you demand. Developments in underground mining are leading towards large-scale production with fewer sublevels, longer holes and more selective mining, and our offering will help prepare you for your future needs.

This trend naturally makes drilling accuracy more important than ever. Many factors can influence the straightness of the drill hole: rock and ore properties, the drilling method, the power and set-up of the drill rig, and the correct choice of drilling tools. In this context, a Sandvik MF rod string is a tolerant and forgiving tool system. In addition, it also delivers impressive hole straightness.

With our unique in-house manufacturing facilities for producing, machining and tailoring steel, we are able to modify the metallurgical properties of all crucial Sandvik MF rod components. This is why all of our rod strings are given specific material characteristics in order to maximize wear, fatigue and corrosion resistance. Ultimately, this

boosts your drilling performance by making operations simple and ensuring productivity at all times. In long-hole production drilling, the main advantage of our tube drilling system is the high rate of penetration: the straightness and quality of the drill-holes and the low total production cost.

Our hole diameters range between 76 and 115 mm. A correctly assembled tube string in a stable rig permits the accurate drilling of holes up to 60 meters. This benefits your bottom line. Hole deviation adversely affects profitability in the form of poor fragmentation, low ore recovery and ore dilution. Using our tools has been proven to reduce deviation by up to 40 percent.

RELIABLE PERFORMANCE THAT CUTS COSTS

While every component in the drill string is crucial, the shank adapter must be engineered to transmit impact energy from the rock-drill piston – along with rotation torque – into the drill string with no losses. It must withstand and transmit up to 6,300 blows per minute from the piston continually, and do so with great endurance and dependability.

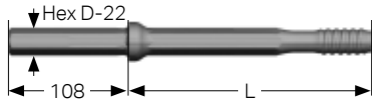

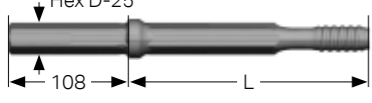

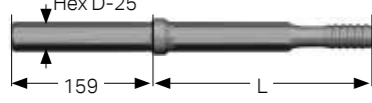

With this in mind, we manufacture premium quality shank adapters for most brands of rock drills. We have yet more specially developed products that are not featured in this catalog. Please visit our website or contact us directly to find out more, and to order the shank adapter that will keep you drilling.

TOP-GRADE TOOLS TO KEEP YOU MOVING

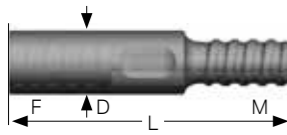

Auxiliary tools are an important part of the drilling application. This is why we provide top-grade tools in order to keep your process moving, and to avoid unnecessary and costly downtime. Our accessories for top hammer drilling tools are simple, practical additions. Their purpose is to enable the tool system to

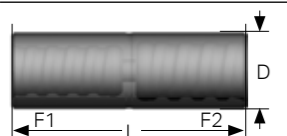

be tailored to meet your different demands, in different applications and working environments. Furthermore, our auxiliary tools optimize your system, providing higher productivity and reliability with lower operating costs and minimal environmental impact.

BIT DIAMETER WEAR GAUGE

FOR MEASURING DIAMETER ON DRILL BITS

Measures bit diameter from 40,6 mm to 53,6 mm in steps of 0,2mm.
Partno: 795-1310

BIT CLASSIFICATION - SYMBOL EXPLANATION

1. These bits are designed to deliver maximum penetration rates. They tend to work best in soft to medium-hard (up to 150 MPa) and non-abrasive rock formations.
2. These bits are designed to deliver maximum penetration rates. They tend to work best in soft to medium-hard (up to 150 MPa) and non-abrasive rock formations.
3. These bits offer a balance between penetration rate and bit service life. They will drill fast, while still delivering rock tool economy in a wide range of rock conditions.
4. These bits offer a balance between penetration rate and bit service life. They will drill fast, while still delivering rock tool economy in a wide range of rock conditions.
5. These bits are optimized to provide the best possible rock tool economy through long service life. This is especially true and important in hard and abrasive rock formations (above 20 percent silica).

GRINDING EQUIPMENT

LET US MAKE YOUR GRINDING MORE PROFITABLE

We offer a wide range of high quality grinding machines, grinding wheels and cups. Every product is specifically designed to increase safety, productivity and – not least – revenue. They all work perfectly with the TH, DTH, integral steels and cross and X-bits. We know that every customer has their own specific challenges that require different solutions.

This is why we offer products which are suitable for all conceivable situations – from grinding directly at the drill rigs, to grinding in workshops for high levels of production. We also offer spare parts, as well as all the support you need to create a safe and successful mining and construction business.

INTEGRAL STEEL GRINDER

GRINDING APPLICATIONS

Mobile, lightweight, electrical grinder. Intended for frontal and gauge grinding of chisel integral steels.

TECHNICAL DATA

Air pressure	Max 8 bar
Air consumption	5–10 l/sec
Rated power (motor)	1.1 kW
Idling speed	2800 (50 Hz) RPM/ 3400 (60 Hz) RPM
Hose connections:	
Air, air hose	9.5 mm (3/8")
Water, water hose	9.5 mm (3/8")
Dimensions: H × W × D	611 × 550 × 350 mm
Grinding wheel dimensions	127 × 546 × 321 mm
Weight inclusive of grinding wheel	21.5 kg
Cutting-edge radius	80 mm
Cutting-edge angle	110°

PART. NO FOR MACHINES

Complete grinder, hydraulic powered 796-5320-XX*
*For two last digits, see table below, under "Code"

VOLTAGE/PHASE ALT.

Voltage	Phases	Hz	Code
220–240 V	1	50/60 Hz	50
380–420 V	3	50/60 Hz	52
220–240 V	3	50/60 Hz	59

ACCESSORIES (INCLUDED IN MACHINE DELIVERY)

Grinding wheel for dry grinding	797-1227-15
Protective goggles	797-5771
T-hexagon wrench	797-5766-06

ACCESSORIES (OPTIONAL)

Grinding wheel (dry grinding)	797-1227-15
Grinding wheel (wet grinding)	797-1227-10
Kit for grinding plug hole drill steels	797-5489-50
Mounting bracket (for drill rig)	797-5330-91
Support for integral steels	797-5330-92
Grinding template for chisel bit	795-1343
Grinding template for plug hole steels	795-1336

RECOMMENDED LUBRICANTS

Grease, 0.42 kg cartridge 797-5773-22

INTEGRAL STEEL GRINDER

GRINDING APPLICATIONS

Mobile, lightweight, pneumatic grinder. Intended for frontal and gauge grinding of chisel integral steels.

TECHNICAL DATA

Air pressure	Max 8 bar/min 6 bar
Air consumption	40–60 l/sec
Rated power (motor)	1.7 kW
Idling speed	4900 RPM
Hose connection:	
Air, air hose	12.5 mm (1/2")
Air or water hose for cooling	9.5 mm (3/8")
Dimensions: H × W × D	660 × 550 × 350 mm
Grinding wheel dimensions	127 × 63 × 32 mm
Weight inclusive of grinding wheel	18.5 kg
Cutting-edge radius	80 mm
Cutting-edge angle	110°

PART. NO FOR MACHINES

Grinder, air powered 796-5300

ACCESSORIES (INCLUDED IN MACHINE DELIVERY)

Grinding wheel for dry grinding 797-1227-15
 Protective goggles 797-5771
 T-hexagon wrench 797-5766-06
 Support bracket 797-5289

ACCESSORIES (OPTIONAL)

Grinding wheel (dry grinding) 797-1227-15
 Grinding wheel (wet grinding) 797-1227-10
 Kit for grinding plug hole drill steels 797-5489-50
 In line oiler 797-5747-50
 Mounting bracket (for drill rig) 797-5330-91
 Support for integral steels 797-5330-92
 Grinding template for chisel bit 795-1343
 Grinding template for plug hole steels 795-1336

RECOMMENDED LUBRICANTS

Air tool oil, 1 liter 797-5870-90
 Grease, 0.42 kg cartridge 797-5773-22

D = 127 mm
 W = 63 mm
 d = 32 mm
 D1 = 80 mm
 w = 50 mm

RG140P

INTEGRAL STEEL GRINDER AND CROSS GRINDER

GRINDING APPLICATIONS

Basic pneumatic grinder intended for frontal and gauge grinding of integral steels (with straight grinding wheel) or cross and X-bits (with angled grinding wheel). The machine is suitable for bit sizes: Integral steels, all diameters. Cross bits Ø 33–43 mm.

TECHNICAL DATA

Air pressure	Max 8 bar/min 6 bar
Air consumption	40–60 l/sec
Rated power (motor)	1.7 kW
Idling speed	3000 RPM
Hose connection:	
Air, air hose	12.5 mm (1/2")
Dimensions: H × W × D	505 × 276 × 326 mm
Grinding wheel dimensions:	
Grinding wheel, 132°	200 × 28 × 32 mm
Grinding wheel, straight	200 × 32 × 32 mm
Weight inclusive of grinding wheel	22 kg

PART. NO FOR MACHINES

Grinder, air powered 796-3800

ACCESSORIES (INCLUDED IN MACHINE DELIVERY)

Grinding wheel, for 90° cross bits (bit size: Ø 33–43, for dry grinding) 797-1185-28*
 Grinding wheel dresser 796-1858
 Protective goggles 797-5771
 T-hexagon wrench 797-5766-06
 Dressing template for 4-inserts (for 90° cross bits) 797-6035-06

ACCESSORIES

(NOT INCLUDED, TO BE ORDERED SEPARATELY)

Grinding wheel, straight for gauge grinding (for dry grinding) 797-1101-32**
 Grinding wheel, for 90° cross bits (bit size: Ø 33–39, for dry grinding) 797-1101-25

ACCESSORIES (OPTIONAL)

Spare rollers for wheel dresser 796-1867
 In line oiler 797-5747-50
 Mounting bracket (for drill rig) 797-5330-91

RECOMMENDED LUBRICANTS

Air tool oil, 1 liter 797-5870-90
 Grease, 0.42 kg cartridge 797-5773-22

 d = 32 mm

RG400

BUTTON BIT GRINDER

GRINDING APPLICATIONS

Handheld, lightweight, lower-powered pneumatic grinder intended for all kinds of button bits with max button size of 10 mm.

TECHNICAL DATA

Air supply pressure	Max 8 bar/min 6 bar
Air consumption	16–17 l/sec
Spindle speed	14000 RPM
Flushing air pressure	Max. 6 bar
Flushing water pressure	Max. 6 bar
Water consumption	5–6 l/min
Hose connections:	
Air, air hose	12.5 mm (1/2")
Water, water hose	6.3 mm (1.4")
Dimensions: H × W × D	156 × 533 × 84 mm
Weight	2.9 kg

PART. NO FOR MACHINES

Complete grinder 796-5116

ACCESSORIES (INCLUDED IN MACHINE DELIVERY)

O-ring	797-5888-24
Hose, 6/4 mm	797-5957-06
Connector, 6-1/4"	797-5899-13
Nylon packing, 1/4"	797-5934-13
House Nipple, 1/4"-R1/4"	797-5777-13
Plug 6, R9 6 mm	797-5769-06

BUTTON BIT GRINDER

GRINDING APPLICATIONS

Stationary electrical grinder for workshops, or to be mounted onto drill rigs. Intended for all kinds of button bits. Bit holder suitable for diameters of up to Ø 122 mm: Top hammer (TH) button bits (normal skirt) up to Ø 152 mm, TH button bits (Retrac skirt) up to Ø 127 mm and down the hole button bits up to Ø 200 mm (max. shank Ø 110 mm and max. head length 110 mm).

TECHNICAL DATA

Air supply pressure	Max 10 bar/min 6 bar
Air consumption	0.5–3 l/sec
Water supply pressure	Max 8 bar/min 3.5 bar
Water consumption (cooling tank)	2–4 l/min
Water consumption (pump)	0.2–1 l/min
Coolant/flushing medium	Water
Rated power (motor)	1.5 kW
Air connection, air hose	9.5 mm (3/8")
Water connection, water hose	9.5 mm (3/8")
Dimensions: H × W × D	730 × 390 × 390 mm
Weight	45 kg

PART. NO FOR MACHINES

Grinder with cover	796-6215-XX*
Grinder with pump and cover	796-6265-XX*

*For two last digits, see table below, under "Code"

BUTTON BIT GRINDER

GRINDING APPLICATIONS

Stationary electrical grinder for workshops. Intended for all down the hole (DTH) button bits. Bit holder suitable for diameters up to Ø 106 mm: DTH button bits up to Ø 178 mm (max. shank Ø 106 mm and max. head length 92 mm).

TECHNICAL DATA

Air supply pressure	Max 10 bar/min 6 bar
Air consumption	0.5–3 l/sec
Water supply pressure	Max 8 bar/min 3 bar
Water consumption	0.2–1 l/min
Coolant/flushing medium	Water
Rated power (motor)	1.5 kW
Air connection, air hose	9.5 mm (3/8")
Water connection, water hose	9.5 mm (3/8")
Dimensions: H × W × D	990 × 670 × 795 mm
Weight	95 kg

PART. NO FOR MACHINES

Grinder with cover	796-6105-XX*
Grinder with pump and cover	796-6155-XX*

*For two last digits, see table below, under "Code"

RG470 PRO

BUTTON BIT GRINDER

GRINDING APPLICATIONS

Highly efficient stationary electrical grinder for workshops. Intended for all button bits. Top Hammer (TH) bits Ø 28 mm (bit length > 65 mm) up to Ø 152 mm, and down the hole (DTH) bits Ø 90 mm up to Ø 270 mm.

TECHNICAL DATA

Air supply pressure	Max 10 bar/min 6 bar
Air consumption	0.5 – 2 l/sec
Water supply pressure	Max 8 bar/min 3.5 bar
Water consumption	1 l/min
Coolant/flushing medium	Water
Rated power (grinding motor)	3 kW
Air connection, air hose	9.5 mm (3/8")
Water connection, water hose	9.5 mm (3/8")
Dimensions: H x W x D	2290 x 1337 x 1422 mm
Weight	320 kg

WATER CIRCULATION UNIT

GRINDING APPLICATIONS

Water circulation unit used to take care of cobalt particles in the coolant water, generated from grinding machines. This minimizes operators exposure of hazardous substances. Sandvik Water circulation unit is designed for workshop use and can be integrated with any variant of Sandvik grinding machine.

TECHNICAL DATA

Air supply pressure	Max 10 bar/min 6 bar
Air consumption	Max. 200 LPM
Air connection, air hose	6 mm (1/4")
Water connection, water hose	12 mm (1/2")
Flushing pump (to grinding machine)	1 LPM to 20 LPM Pr. 2.5 Bar, 24VDC
Filtering pump (to filter)	12.5 LPM, Pr. 2.5 Bar, 24VDC
Filter rating	5 µm, long PP
Filter dimension	Ø x L 2.5" x 20" (63.5 x 508 mm)
Filtered water tank capacity	30 Liters
Sedimentation tank capacity	34 Liters
Dimensions: H x W x D	1010 x 1012 x 525 mm
Weight (dry weight)	35 Kgs
